OBJECTIVE

Aspiring Software Engineering student at AlYamamah University with a focus on Business Analysis, Quality Assurance, and Requirements Engineering. Experienced in gathering and documenting software requirements, building use-case models, and supporting project delivery using industry-standard tools. Seeking a co-op opportunity to apply my QA and BA skills to real-world projects, contribute to high-quality software solutions, and gain hands-on experience in a professional business environment.

EDUCATION

AlYamamah University

| Riyadh, Saudi Arabia

Bachelor of Science in Software Engineering

Expected Graduation: 2026

- Relevant Coursework: Software Requirements Engineering, Software Quality Assurance (SWE QA), Verification & Validation (V&V), Project Management
- Completed INTERLINK International Institutes program at AlYamamah University — developed English proficiency, academic writing, professional communication, and teamwork skills

SKILLS

- Technical Skills: Requirements Elicitation & Documentation, FR/NFR/BR Modeling, Software Testing & QA (Manual & Automated), SDLC, Tools: Figma, JIRA, AI Tools, Python, React, SQL
- Soft Skills: Communication & Interpersonal Skills, Team Collaboration, Problem-Solving, Critical Thinking, Quick Learner, Attention to Detail.
- Completed the INTERLINK International Institutes Academic Preparation Program at Al Yamamah University (2022), enhancing advanced academic English, technical writing, cross-cultural communication, and professional presentation skills for global work environments.

PROFESSIONAL & PROJECT EXPERIENCE

AlYamamah University — Graduation Project

Riyadh, Saudi Arabia

Shawaf: AI-Powered Smart Tourism Platform

2025 – 2026

- Gathered and analyzed user requirements to define functional, non-functional, and business needs for an AI-powered travel platform.
- Designed intuitive UI/UX prototypes and workflows to enhance usability, guided by user research and feedback.
- Conducted user research and usability testing to optimize trip-planning experience; incorporated insights into iterative design improvements.
- Collaborated on AI personalization features and mapped requirements to technical implementation using LLM APIs and Google Maps API.

AlYamamah University — Software Requirements Project

Riyadh, Saudi Arabia

FR / NFR / BR Use Case Modeling

2025

- Developed complete use-case documentation clearly separating Functional, Non-Functional, and Business Requirements for a university software project, improving team understanding of system scope.
- Built a full FR/NFR/BR traceability matrix using MS Word, Excel, Figma, and JIRA — providing a reliable foundation for QA testing and project validation activities.
- Delivered clear, well-structured requirements documentation that was used as the basis for software verification and validation in follow-on project phases.

CERTIFICATIONS

- IoT Fundamentals — Cisco / Misk Academy (In progress)
- Business analyst – IBM (In progress)

EXTRACURRICULAR ACTIVITIES & INTERESTS

- Interests: Passionate about Artificial Intelligence, Requirements Engineering, Software Quality Assurance, and Project Management; enjoys exploring how technology can be used to solve everyday problems and improve user experiences.
