OBJECTIVE

Senior Software Engineering graduate passionate about digital transformation and building user-centred solutions that bridge business needs and technical execution. With hands-on experience in mobile app development, software testing, and requirements documentation, with exposure across start-up, corporate, and academic environments. Motivated to contribute to real-world digital products through a co-op experience.

EDUCATION

Al Yamamah University

Bachelor of Science in Software Engineering

Riyadh, Saudi Arabia

Expected Graduation: Jan 2027

- Relevant Coursework: Software Requirements Engineering, Software Quality Assurance, Software Verification & Validation, Advanced User Interface Design.

Interlink International Institutes

English Language Proficiency Program

Riyadh, Saudi Arabia

Aug 2022 – Jul 2023

SKILLS

- Technical Skills: Documentation, UI/UX Design, Software Testing, QA, Software Engineering, Vibe coding.
- Soft Skills: Public Speaking, Communication, Teamwork, Problem-Solving, Adaptability.

PROFESSIONAL & PROJECT EXPERIENCE

Ojoor Business Solutions

Intern | Part Time

Riyadh, Saudi Arabia

May 2025 – Oct 2025

- Developed a fully functional social media mobile application using Flutter Flow, delivering a complete user-facing product from design through to deployment.
- Conducted structured website testing, identified and reported critical bugs, and translated findings into actionable business improvement recommendations.
- Supervised diploma students during their co-op training, providing technical guidance, progress monitoring, and professional mentorship throughout their placement.

Wahat Assaif

IT | Part Time

Riyadh, Saudi Arabia

Oct 2025 – Present

- Managed and processed government-related digital transactions and technical operations, ensuring accuracy, compliance, and timely resolution of all IT-related tasks.
- Leading the planning and design of a web-based system to track and manage air conditioning maintenance technicians, improving operational visibility and scheduling efficiency.

Shawaf | AI-Powered Smart Tourism Platform | GP

Business Analyst & UI/UX Designer

Riyadh, Saudi Arabia

2025

- Developed comprehensive business requirements documentation defining core objectives, functional requirements, and system scope for a Vision 2030-aligned AI tourism platform.
- Designed user-centred interface prototypes in Figma, applying UX principles to ensure high usability, intuitive navigation, and a seamless end-user experience.
- Collaborated with the development team to translate business and design requirements into actionable technical specifications across the project lifecycle.

CERTIFICATIONS

- Prompt Engineering Basics, 11 Hours | IBM 2026
- Introduction to IoT and Digital Transformation, 16 Hours | Cisco Networking Academy 2026

EXTRACURRICULAR ACTIVITIES & INTERESTS

- Career Services Centre Ambassador, leading ambassador team, organised student events, and represented the university at global event TDX as a speaker.
- Founder & Organizer of “Alyamamah Alumni” Initiative, launched and led a workshop series targeting Al Yamamah graduates, including participant interviews, selection, and full program execution.
- Passionate about mobile application development, digital transformation, and the use of AI to build smarter, user-focused products that solve real-world problems.
